ONLINE POWDER TRAINING AND CERTIFICATION

To protect the operator and assure safety on the jobsite, OSHA and ANSI require all powder actuated tool users to be trained and certified for the tool that will be used. Ramset enables you to receive training thrrough our website training program. This approach combines interactive web-based training techniques and online testing with feedback during the test.

The course consists of approximately 30 pages of usage, safety, and troubleshooting material. Upon completion of this brief course, you will immediately take an online exam. With successful completion of the exam, you then print a Ramset certification card.

At the end of the course, you are also given the ability to download individual tool manuals.

To take the course, and be certified to operate a Ramset powder actuated tool:

- Go to www.Ramset.com
- Find the heading called ***Get Your License***
- Click ***P.A.T. Licensing***
- Click ***Begin Operator Course*** (choose English / Spanish / French)
- When course is complete, take the test
- After passing the test, download and print your certificate
- Place the certificate in your wallet

DEDICATED TO AMERICAN MADE PRODUCTS

Ramset is unique in the world of construction tools and fasteners. Overall, 98% of Ramset fasteners and accessories are made in the USA.

Unlike our competitors you know you are buying American made products and supporting the American economy and workers when you buy Ramset. Ramset's parent company, Illinois Tool Works (NYSE: ITW) employees more than 25,000 Americans.

GSA

BUY AMERICAN ACT

SEC. 1605—Use of American iron, steel, and manufactured goods.

(a) None of the funds appropriated or otherwise made available by this Act may be used for a project for the construction, alteration, maintenance, or repair of a public building or public work unless all of the iron, steel, and manufactured goods used in the project are produced in the United States.

(b) Subsection (a) shall not apply in any case or category of cases in which the head of the Federal department or agency involved finds that—

(1) applying subsection (a) would be inconsistent with the public interest;

(2) iron, steel, and the relevant manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality; or

(3) inclusion of iron, steel, and manufactured goods produced in the United States will increase the cost of the overall project by more than 25 percent.

(c) If the head of a Federal department or agency determines that it is necessary to waive the application of subsection (a) based on a finding under subsection (b), the head of the department or agency shall publish in the Federal Register a detailed written justification as to why the provision is being waived.

(d) This section shall be applied in a manner consistent with United States obligations under international agreements.

*Excerpted from HR 1, "American Recovery and Reinvestment Act of 2009", Division A, Title XVI, Section 1605

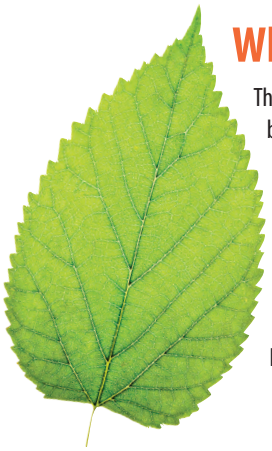
MADE IN AMERICA Ramset

The following is a sampling of projects that have utilized the Buy American Act using Ramset products:

- Rams / Chargers Stadium, Los Angeles CA
- Four Seasons, Boston MA
- Amazon Warehouse, San Antonio TX
- Midway Airport Expansion, Chicago IL
- Dolphins Stadium, Miami FL



What is LEED?

The purpose of Leadership in Energy and Environmental Design (LEED) is to construct buildings in an energy efficient manner and reduce the buildings' energy consumption. As a result, these buildings can help conserve non-renewable energy resources; decrease dependence on foreign oil; and lower greenhouse gas emissions.

Ramset LEED Credit MR 5.1

MR 5.1 was developed with the intent to increase demand for building materials and products that are extracted and manufactured within the region, thereby supporting the use of indigenous resources and reducing the environmental impact resulting from transportation.

Ramset fasteners may meet the requirements for LEED MR 5.1 if your project falls within 500 miles of our manufacturing facilities.

How to calculate LEED MR 5.1

LEED MR Credit 5.1 is calculated on a 500 mile radius from/to distribution points. Use Google Maps to calculate the distance to your project from:

Location	Zip Code	Product
Itasca, IL	60143	GypFast G2 & Fasteners
Paris, KY	40361	Powder & Gas Fasteners

RECYCLING

Ramset Recycles

Ramset has always recognized the value of utilizing recycled materials where available.

The raw material sourced for the manufacture of Ramset pins contains approximately 10-20% mill scrap when it is converted to wire material. The plastic and casing material in our loads typically consists of 10% recycled material.

Our packaging also contains post-consumer recycled material. The paper board (inner cartons) containers are typically made from 40% recycled material; corrugated cartons typically contain 30-35% recycled material.

ITW saw a challenge: how to create a portable tool that delivered the power of pneumatic tools without the hoses and compressors. In 1991, ITW Paslode conquered the challenge with the revolution of gas-powered technology. The cordless Impulse Finish Nailer delivered the power of pneumatic tools without cluttering job sites.

With the thought of Driving Jobsite Speed while creating a safer work environment, ITW Ramset built upon the Paslode technology and in 1992 introduced the TrakFast to the drywall trade. It forever changed the way the world worked. In 2003, ITW Ramset followed up on the success of the TrakFast with the T3SS which is setting the standard for electrical and mechanical contractors. Then in 2021 Ramset raised the bar once again for gas fastening with the introduction of the T4 platform

Gas significantly lowers cost-in-place, reduces stress on the employee, and it's much quieter to use than drilling or powder actuated tools (PATs), so you can work in occupied buildings. There are times when you need the power and accuracy of our PATs—like the speed of our RA54 Magazine Tool. But constant use of these tools can be noisy and overly jarring on the body.

Drywall

Electrical

Mechanical

- No Licensing Required
- Fast and Easy to Use
- Quiet—No Recoil
- No Cords or Hoses
- Long Fuel Cell & Battery Life

When the conditions are right, gas is the right choice.

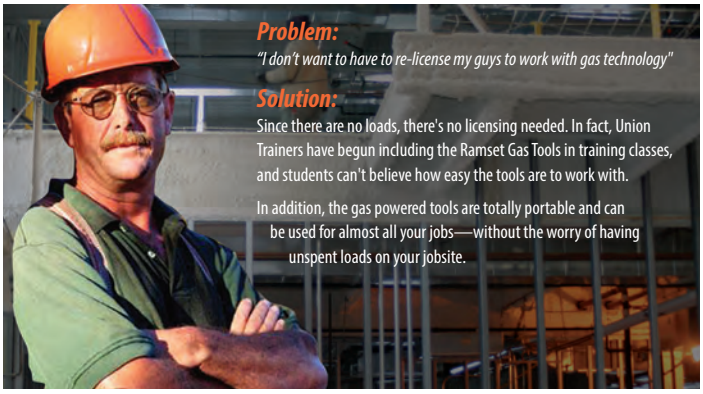
Problem:

"My guys work on block all day long—from electrical boxes to furring. I've tried powder tools and they blow holes in block. What makes the Ramset technology different?"

Solution:

Ramset technology has patented overdrive technology built in to every gas-powered tool. The tool works under the same principal as a combustion engine. A little gas, a little spark and a powerful shot, without the recoil associated with powder.

The industry transitions to gas technology



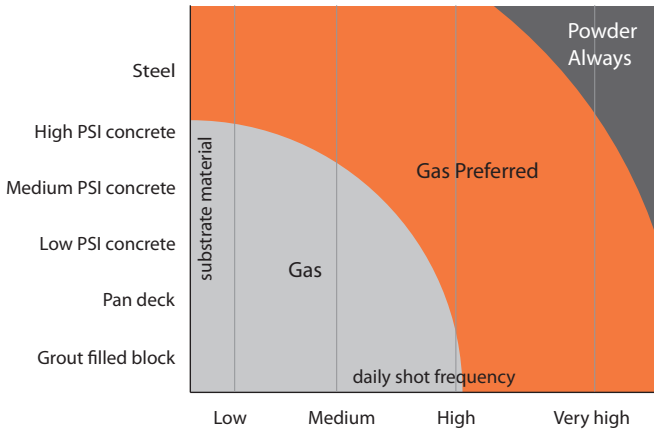
Problem:

"I don't want to have to re-license my guys to work with gas technology"

Solution:

Since there are no loads, there's no licensing needed. In fact, Union Trainers have begun including the Ramset Gas Tools in training classes, and students can't believe how easy the tools are to work with.

In addition, the gas powered tools are totally portable and can be used for almost all your jobs—without the worry of having unspent loads on your jobsite.

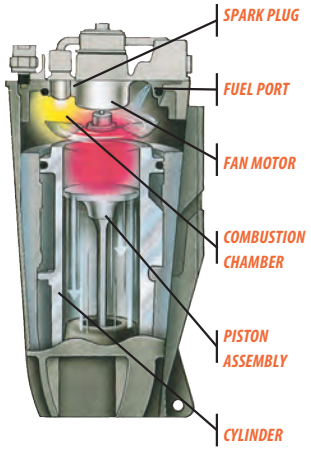


The Inside Story

The patented Ramset technology delivers precisely balanced power eliminating the damage caused by overdrive in PATs.

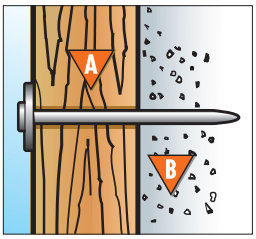
How it works: As the nosepiece is depressed, a rechargeable battery turns on the fan motor. In less than a second: a precise amount of fuel is injected into the combustion chamber. When the trigger is pulled, a spark creates an explosion that drives the piston into the fastener, and the fastener in the work surface. The action creates a vacuum that pulls the piston back to the start position.

In fact the technology is so precise it won't blow through a pop can.



SELECTING THE CORRECT FASTENER LENGTH

SELECTING THE CORRECT FASTENER LENGTH



High quality fasteners provide consistent and reliable performance in concrete, block, masonry, and steel applications. Choosing the correct fastener for the job will assure professional results.

A Determine thickness of material being attached.

B Fastener must be long enough to drive approximately 1" into concrete, cement block or penetrate thickness of steel.

POWER LEVEL GUIDE FOR LOADS

All loads are color coded and load level numbered. As the number increases, the power level increases.

Always start with the lightest load. If the fastener does not set completely, use the next higher load and repeat the process.

2 .....Brown

3 .....Green

4 .....Yellow

5 .....Red

Least Powerful

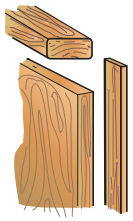
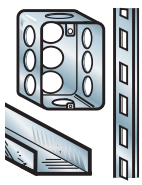
TYPICAL USES



WOOD ATTACHMENT MATERIAL*	CONCRETE BASE MATERIAL		STRUCTURAL STEEL BASE	
	Commonly Used Fastener	Commonly Used Load	Commonly Used Fastener	Commonly Used Load
2 x 4	1516SDC (2-1/2")	Yellow #4	1514SD (2") SP178 (1-7/8")	Red #5 Red #5
3/4" Plywood for furring strip	1512 (1-1/2")	Yellow #4	1510 (1-1/4")	Yellow #4
1/4" - 1/2"	1510 (1-1/4")	Green #3	SP34 (3/4")	Yellow #4

* Use Ramguard Pin for treated lumber.



THIN GAGE STEEL	CONCRETE BASE MATERIAL		STRUCTURAL STEEL BASE	
	Commonly Used Fastener	Commonly Used Load	Commonly Used Fastener	Commonly Used Load
Electrical Junction Boxes	M100BB (1")	Green #3	SP58TH (5/8")	Yellow #4
Shelf Brackets	M100BB (1")	Green #3	SP34 (3/4")	Yellow #4
Interior Drywall Track	1506/1506B (3/4")	Green #3	SP12 (1/2")	Yellow #4
Perimeter Track	1510 (1-1/4")	Yellow #4	SP12 (1/2")	Yellow #4

NOTE: This chart is presented as a guide only. Start with the lightest load. If the fastener does not set completely, use the next higher load and repeat the process. Product suggestions may not be suitable for all types of base materials. Contact Technical Services if you have further questions.

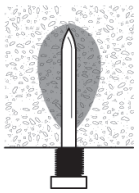
FASTENING TO CONCRETE AND STEEL

FASTENING TO CONCRETE

As the fastener enters the concrete, extreme pressures and heat are created. This creates a bond that provides high loading strength in concrete snugly and provides tool protection.

FASTENING TO STEEL

The resilience of steel provides a clamping effect to the fastener. This combined with the tremendous heat that is created, provides a welding and clamping effect to give maximum holding power.



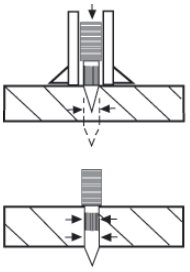
EDGE / SPACING / BASE MATERIAL THICKNESS REQUIREMENTS

The following represents the minimum edge and spacing requirements, plus base material thickness requirements:

CONCRETE

1. **Edge distance.** Do not fasten closer than 3 inches from the edge of concrete. If the concrete cracks, the fastener may not hold and may allow the fastener to ricochet, causing serious injury or death to the operator or bystanders.
2. **Recommended minimum fastener spacing.** Setting fasteners too close together can cause the concrete to crack. The recommended MINIMUM DISTANCE between fastening is three (3) inches. Never attempt a fastener application too close to another previously inserted fastener to prevent the second fastener from ricocheting off the previously installed fastener. A ricochet can result in serious injury or death to the operator or bystanders.
3. **Concrete thickness.** It is important that the concrete be at least three (3) times as thick as the fastener penetration. If the concrete is too thin, the compressive forces forming at the fastener's point can cause the free face of the concrete to break away. This creates a dangerous condition from flying concrete and/or the fastener and also results in a reduction of fastener holding power.

STEEL



1. **Edge distance.** The recommended edge distance for a fastener to the edge of steel is 1/2 inch. Never fire the tool within 1/2 inch of the edge of a steel base material because the steel may bend or break off, allowing the fastener to ricochet, causing serious injury or death to the operator or bystanders.
2. **Recommended minimum fastener spacing.** The recommended minimum distance between fastening is 1 inch. Never attempt a fastening application too close to another previously inserted fastener to prevent the second fastener from ricocheting off the previously installed fastener. A ricochet can result in serious injury or death to the operator or bystanders.
3. **Steel thickness.** Do not fasten into steel base material thinner than the fastener shank diameter. Holding power will be reduced and the fastener may be over-driven, creating a dangerous situation to the operator or bystanders due to a free-flying fastener.

HOW TO SELECT A POWDER ACTUATED FASTENER

- **DRIVE PINS** are used to directly fasten an object (permanent installation).
- **THREADED STUDS** are used where the object fastened is to be removed or where shimming is required. The following shows how to determine shank and thread length. Required penetration is determined by load requirement (illustrated in the following examples).

Ramset fasteners may be specified by their type or catalog number to satisfy fastening requirements.

Permanent Installation

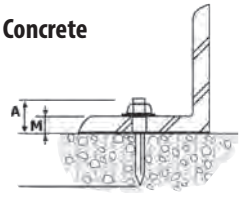
To Concrete

To Steel

Minimum Shank Length	=	Thickness of Material (M)	+	Thickness of Steel (T)	+	1/4 Min. Point Allowance

Removable Installation

To Concrete

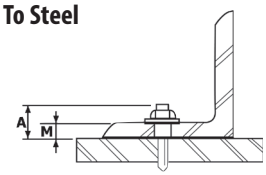


Thread Length (A)	=	Thickness of Material (M)	+	Allowance* for Nut & Washer

Shank Length = 1"

*Allowance for thickness of nut & washer = thread size (i.e. allow 1/4" for 1/4-20 thread, etc.)

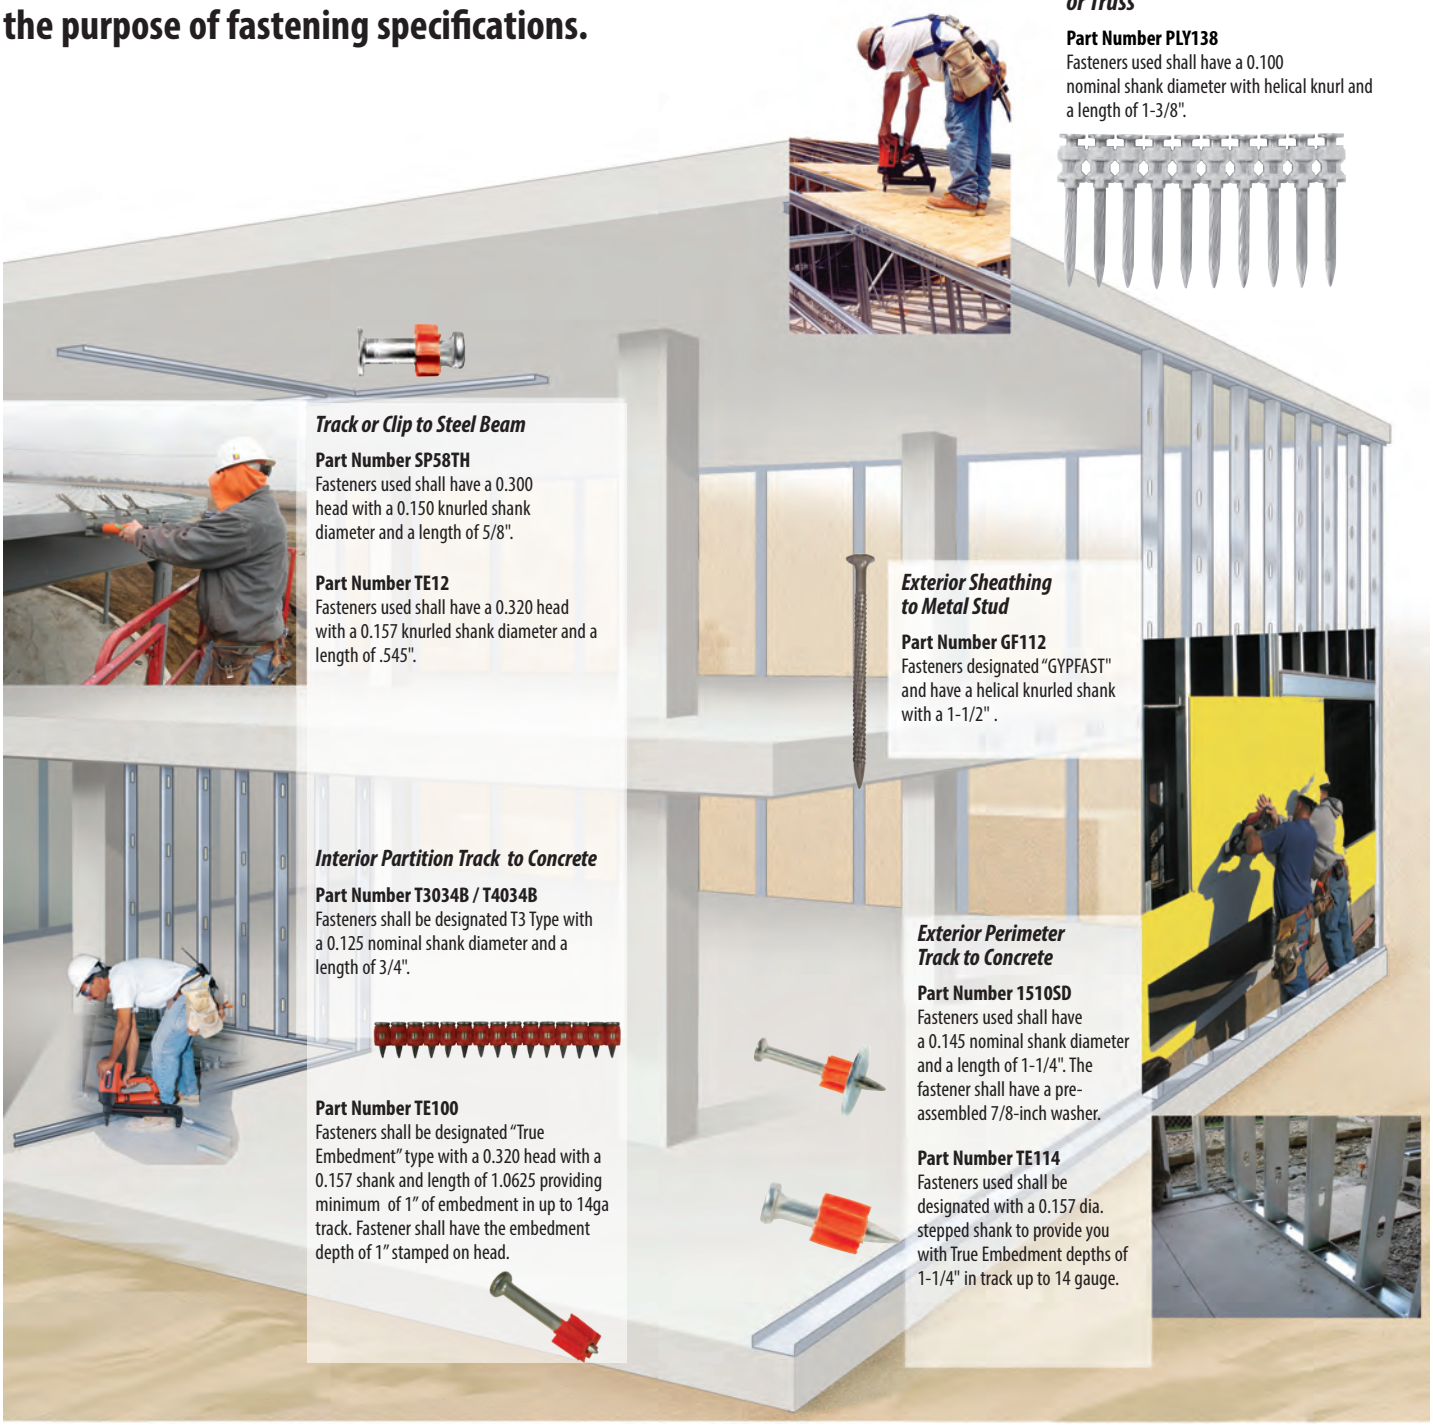
To Steel



Thread Length (A)	=	Thickness of Material (M)	+	Allowance* for Nut & Washer

Shank Length = 1/2"

Ramset provides the architect and engineer the following suggested language and helpful information for the purpose of fastening specifications.



Plywood to Metal Framing or Truss

Part Number PLY138
Fasteners used shall have a 0.100 nominal shank diameter with helical knurl and a length of 1-3/8".

Track or Clip to Steel Beam

Part Number SP58TH
Fasteners used shall have a 0.300 head with a 0.150 knurled shank diameter and a length of 5/8".

Part Number TE12
Fasteners used shall have a 0.320 head with a 0.157 knurled shank diameter and a length of .545".

Exterior Sheathing to Metal Stud

Part Number GF112
Fasteners designated "GYPFAST" and have a helical knurled shank with a 1-1/2" .

Interior Partition Track to Concrete

Part Number T3034B / T4034B
Fasteners shall be designated T3 Type with a 0.125 nominal shank diameter and a length of 3/4".

Part Number TE100
Fasteners shall be designated "True Embedment" type with a 0.320 head with a 0.157 shank and length of 1.0625 providing minimum of 1" of embedment in up to 14ga track. Fastener shall have the embedment depth of 1" stamped on head.

Exterior Perimeter Track to Concrete

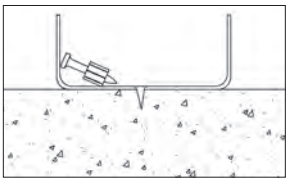
Part Number 1510SD
Fasteners used shall have a 0.145 nominal shank diameter and a length of 1-1/4". The fastener shall have a pre-assembled 7/8-inch washer.

Part Number TE114
Fasteners used shall be designated with a 0.157 dia. stepped shank to provide you with True Embedment depths of 1-1/4" in track up to 14 gauge.

For assistance with specifications and/or substitutions, contact Technical Service at 800-848-5611.

CONCRETE SYMPTOM

FASTENER DOES NOT HOLD IN BASE MATERIAL OR BASE MATERIAL SPALLS



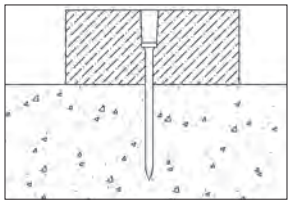
CAUSE

- High strength concrete
- Hard or large aggregate in concrete

ACTION

- Use shorter fastener
- Use PowerPoint pin
- Use load with a different power level

FASTENER PENETRATES TOO DEEP



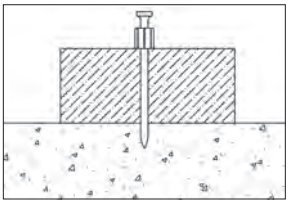
CAUSE

- Fastener too short for application
- Tool power level too high

ACTION

- Use longer fastener
- Use a lighter powder load

FASTENER DOES NOT PENETRATE DEEP ENOUGH



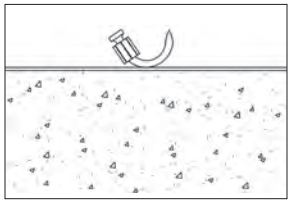
CAUSE

- Fastener too long
- Tool power level too low

ACTION

- Use shorter fastener
- Use a stronger powder load

FASTENER BENDS



CAUSE

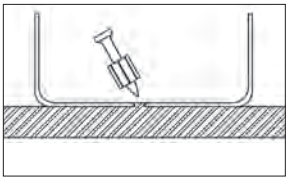
- Fastener hit large aggregate on entry
- Concrete too hard
- Fastener hit rebar just under the surface

ACTION

- Use shorter fastener
- Use PowerPoint pin
- Make sure tool is perpendicular to the work surface
- Move over 3 inches, try to fasten again

STEEL SYMPTOM

FASTENER DOES NOT PENETRATE THE SURFACE



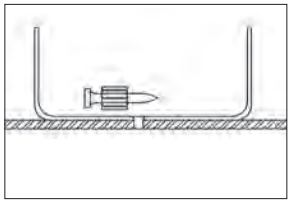
CAUSE

- Driving power too low
- Material may be too hard for forced entry fastener

ACTION

- Increase powder load level
- Use PowerPoint pin

FASTENER DOES NOT HOLD IN BASE MATERIAL



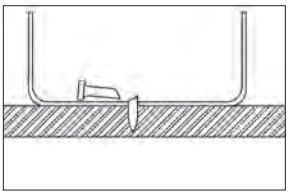
CAUSE

- Steel base material too thin

ACTION

- Use gas system tools with smaller shank pin or Teks Screw

FASTENER BREAKS OR BENDS



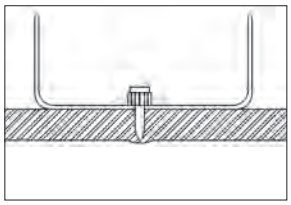
CAUSE

- Driving power is too low
- Fastener is too long
- Material may be too hard for forced entry fastener

ACTION

- Increase powder load level
- Reduce fastener length

FASTENER DOES NOT FULLY PENETRATE STEEL



CAUSE

- Driving power too low
- Steel base material too thick
- Application limit may have been reached

ACTION

- Increase powder load level
- Use PowerPoint pin

SELECTION GUIDE

GAS POWERED TOOLS

	TOOL	DESCRIPTION	TYPICAL BUILDING TRADE*
	**TRAKFAST TF1200** • 42 Pin Magazine • Fully Automatic • 2 Year Warranty	• Length: 17.5" • Height: 15-1/2" • Weight: 7.9 lbs. • Maximum Pin Length: 1-1/2"	**METAL FRAMING**
	**T4MAG** • 45-Pin Magazine • One Step Fuel Injection & Eject • Fully Automatic • 2 Year Warranty	• Length: 18-1/2" • Height: 15" • Weight: 8.55 lbs. • Maximum Pin Length: 1"	**METAL FRAMING**
	**T4SS** • Single Shot Gas Tool • One Step Fuel Injection & Eject • 2 Year Warranty	• Length: 13-1/2" • Height: 15" • Weight: 7.6 lbs. • Maximum Pin Length: 1-1/2"	**ELECTRICAL/MECHANICAL**
	**GYPFAST G2** • 150 Pin Coil • Fully Automatic • 2 Year Warranty	• Length: 15" • Height: 15.25" • Weight: 7.6 lbs. (with battery) • Maximum Pin Length: 2-1/2"	**EXTERIOR SHEATHING**
	**T4 I-F COMPACT** • Single Shot Gas Tool • One Step Fuel Injection & Eject • 2 Year Warranty	• Length: 15" • Height: 15.25" • Weight: 7.6 lbs. (with battery) • Maximum Pin Length: 6"	**INSULATION**

*Building trade shown as suggestions. Tools are not limited to these trades.

		TOOL	DESCRIPTION	TYPICAL BUILDING TRADE*
.27 CAL STRIP TOOLS		**RA27** • Semi-Automatic • Power Adjust • 3 Year Warranty	• Length: 15-3/4" • Weight: 5.3 lbs. • Muzzle Bushing O.D.: 3/4" • Maximum Pin Length: 1-1/2" (2" w/Washer)	**METAL FRAMING**
		**RA54** • Automatic Piston Return • Power Adjust Dialt • 3 Year Warranty	• Length: 19" • Weight: 7.25 lbs. • Muzzle Bushing O.D.: 7/8" • Maximum Pin Length: 3"	**METAL FRAMING**
		**COBRA** • Semi-Automatic • Economical • 1 Year Warranty	• Length: 13-1/4" • Weight: 5.0 lbs. • Muzzle Bushing O.D.: 9/16" • Maximum Pin Length: 2-1/2" (3" w/Washer)	**WOOD FRAMING**
		**VIPER4** • Automatic Piston Return • Designed Specifically for Overhead Applications • 3 Year Warranty	• Length: 17" • Weight: 4.5 lbs. • Maximum Pin Length: 1-1/2"	**ACOUSTICAL/OVERHEAD**
.25 CAL STRIP		**R25** • Semi-Automatic • 1 Year Warranty	• Length: 11.6" • Weight: 4.3 lbs. • Muzzle Bushing O.D.: 3/4" • Maximum Pin Length: 1-1/2"	**WALLS & CEILINGS**

TRAKFAST TF1200

- **Part Number: TF1200**
- Gas Technology
- Fully Automatic
- 1-1/2" Pin Capacity
- 42 Pin Magazine Capacity
- Length: 17.5"
- Height: 15"
- Weight: 8.3 lbs.
- Maximum Capacity: 42 pins
- Maximum cycles/second: 2
- Fuel cell: 1000 shots
- Battery (charged): 3000 shots

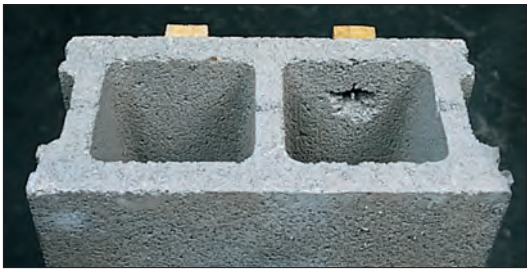
ADVANTAGES

- **SPEED**: Three to five times faster than powder tools. 42-pin magazine reduces load time.
- **EASY TO USE**: Tool automatically resets piston. No recoil, tool absorbs shock resulting in less operator fatigue.
- **NO LICENSING REQUIRED**: Unlike powder-actuated tools, no licensing is required.
- **NO CHANGING LOADS**: TrakFast uses a fuel cell, not a load. No need to inventory different colored loads
- **NARROW NOSE & PROFILE**: Allows tool to reach inside deep leg track (1-5/8" wide x 2" high).
- 2 Year Warranty (6 months on wearable parts).

FEATURES

Still the most revolutionary fastening system in the construction industry!

Since its introduction in 1991, TrakFast has been the tool of choice for both interior and exterior contractors. The TrakFast Automatic Fastening System fastens all types of track, from standard track to hat channel, deep leg, Z, and J channel. Contractors continue to report tremendous savings when using TrakFast for high production fastening. They have learned that TrakFast's actual cost in place beats all other systems. The increased speed and productivity of TrakFast allows the contractor to bid more competitively, complete the job sooner and move on to the next job. Anyone can use TrakFast—just load the pins and fire. It's that easy!



TrakFast ICC ESR-2579 is the only approval that allows you to fasten into any location on a hollow block wall and won't blow away block like a powder tool.

TrakFast's power comes from the battery and fuel cell

The 6-volt rechargeable Nickel Metal Hydride (NiMH) battery can drive approximately 3000 shots per charge. The clean burning fuel cell can drive over 1000 pins and keeps the tool cleaner than powder actuated tools.

Fastening System Productivity

In the time it takes you to drive two pins with a powder tool, you can drive up to 10 pins with TrakFast!

MOST COMMON FASTENERS

PIN #	PIN LENGTH		MOST COMMON APPLICATION
	IN.	(MM)	
FPP012S	1/2	12.7	Track to steel
FPP034B	3/4	19.1	Track to concrete

APPLICATIONS

Track to steel

Lath attachment—using one-inch TrakFast discs and magnetic probe adapter

Furring attachment—perfect fastening every time in soft and hard base materials

Plywood attachment—using TrakFast plywood to steel pin

Track to concrete

T4MAG

- **Part Number: T4MAG**
- Gas Technology
- 45-Pin Magazine
- One Step Fuel Injection
- Fully Automatic
- Length: 18-1/2"
- Height: 15"
- Weight: 8.55 lbs.
- Pin Guide O.D.: .590
- Maximum Pin Length: 1"

ADVANTAGES

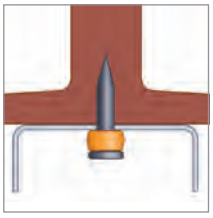
- Higher stick rate than industry standard.
- 30% more power to work in the toughest concrete.
- Drives pins flush to create full embedment.
- Lower pushdown force and shorter travel distance decrease user fatigue.
- Reduced jamming, resulting in less downtime on the job.
- Superb balance leads to optimal user experience.

FEATURES

T4MAG Increase Your Range with Overhead Power

The Power of the T4MAG allows you to consistently shoot where no other gas tool has gone before. The .125 diameter pin is specifically engineered to work in the toughest concrete and steel where other pins cannot perform. The T4MAG system delivers power that rivals other gas and powder systems.

Settling aggregate is the biggest reason for overhead pin failure.



With the T4's 1/2" steel pin you can even shoot into the web of steel.

ACCESSORIES

T4 Fuel Cell
Part No. T4FUEL

Replaces conventional powder loads and drives more than 1000 pins

T4 Battery
Part No. 18581

The 6-volt Li-Ion battery can drive more than 3000 shots per charge

T4 Magnetic Nose Piece
Part No. 19967

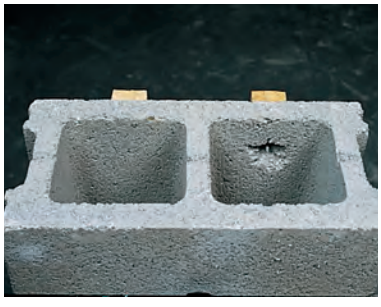
MOST COMMON FASTENERS		ACCESSORIES	
PIN #	DESCRIPTION	ITEM #	DESCRIPTION
T4012	1/2" steel pin with T4 fuel cell	T4FUEL	T4 Fuel (4-pack x 3)
T4012S	1/2" premium steel pin with fuel cell	18581	T4 Battery
T4034B	3/4" concrete pin with T4 fuel cell	18582	Battery Charger
T4034S	3/4" step shank pin with T4 fuel cell	19967	T4MAG Magnetic Nose Piece
T4100	1" concrete pin with T4 fuel cell		

Easy battery loading. Battery rest position allows you to turn off the tool without fully removing the battery.

VIDEO AVAILABLE

APPLICATIONS

The T4 has enough power to fasten into hard concrete and steel and still will not blow through hollow block.



Will not spall hollow block like powder actuated.

Perfect for hat channel applications.

T4SS

VERSATILE, fastens to solid concrete, hollow block, pan deck and steel.

- **Part Number: T4SS**
- Gas Technology
- Single Pin Gas Tool
- Fuel Injection
- Cross Over Technology
- 2 Year Warranty (6 months on wearable parts)
- Length:13-1/2"
- Height: 15"
- Weight: 7.6 lbs.
- Pin Guide O.D.: 1/2" Standard, 7/8" Magnetic
- Maximum Pin Length: 1-1/2"

ADVANTAGES

- Higher stick rate than industry standard
- 30% more power to work in hard concrete
- Drives pins flush to create full embedment
- Easy push-down force decreases user fatigue
- Preassembled fasteners for optimal job performance and easy ordering
- Superb balance leads to optimal user experience

FEATURES

CROSSING OVER FROM POWDER TO GAS

Ramset is serious when it comes to driving job speed by creating the T4SS—the single shot tool that will help move contractors from powder to gas.

The T4SS provides the benefits of shooting a gas tool, including reduced installation time and operator fatigue for the contractor who normally shoots a muzzle loaded powder tool.

To make the T4SS the most versatile gas tool in the industry, users can change out nosepieces to accommodate any fastening need. From metal-to-concrete, hard concrete or steel, pan deck, block and just about surface you can think of the T4SS works for you.

No more fines for unspent loads on the jobsite.

APPLICATIONS

FASTENER AND MAGNETIC NOSEPIECE

The optional interchangeable nosepiece (Part Number 19943) is able to shoot a variety of M series fasteners.

T4CUP

FUEL CELL AND BATTERY

T4 Fuel Cell / Part No. T4FUEL

Replaces conventional powder loads and drives more than 1000 pins

Fuel injection means no additional steps of preparing a fuel cell. Click the fuel cell in place and the tool is ready to go.

T4 Battery / Part No. 18581

The 6-volt Li-Ion battery can drive more than 3000 shots per charge

12HSMP034 clip assembly used to secure conduit

M034 fastener used to hang HVAC Duct Strap

M100 fastener used to attach a junction box

YouTube VIDEO AVAILABLE

Easy battery loading. Battery rest position allows you to turn off the tool without fully removing the battery.

MOST COMMON FASTENERS

PIN #	DESCRIPTION	INNER PACK QTY	CASE QTY
14TRHMP034	1/4" Rod Hanger with 3/4" plated pin (UL)	100	800
12HSMP034	1/2" Hole strap with 3/4" plated pin	100	800
34CCMP034L	3/4" Conduit clamp with 3/4" plated pin (UL)	25	150
TSHMP034	Tie strap holder with 3/4" plated pin (UL)	50	1250
M100	1" Plated pin with domed washer	100	5000
MP034TH	3/4" Plated pin with top hat	200	5000

GYPFAST G2

Fully Automatic Cordless Gas Fastening System for Attaching Exterior Sheathing to Light Gauge Steel Framing

- **Part No.: G2**
- Fully Automatic
- 2-1/2" Pin Capacity
- Length: 15"
- Height: 15.25"
- Weight: 7.6lbs. with battery
- Lengths: 1-1/2", 2" and 2-1/2"
- Pin Diameter: .140" Nominal
- Head Style: 5/16" dia. bugle head
- Finish: Long Life Coating

ADVANTAGES

- Exterior Gypsum sheathing to steel framing
- Plywood and OSB sheathing/flooring
- Fiber cement panel attachment
- Blocking
- Exterior walls
- Windows/door bucks
- Specialty exterior sheathing attachment
- Woven wire mesh or expanded metal lath to steel framing

FEATURES

- Fully automatic system with 150 nail capacity is 3-5 times faster than screwing.
- Fast set-up and tear down – insert battery, fuel cell and nail coil – eliminates need for extension cord, hoses and compressors.
- Aggressive, patented nail shank design provides high pullout performance.
- Contoured bugle head style provides high pullover (wind) resistance.
- Long life coating is 10 times more corrosion resistant than electro-zinc plating.
- Woven wire mesh or expanded metal lath to steel framing
- 2 year warranty

MOST COMMON FASTENERS

PIN #	.140" DIA. KNURLED SHANK 5/16" DIA. BUGLE HEAD		MASTER CARTON	APPLICATION
	IN.	(MM)		
GF112	1-1/2	38.1	6,000 nails/ctn (40- 150 ct. coils) 6 fuel cells	Single Layer of Exterior Sheathing, Wood Furring and Blocking
GF212	2-1/2	63.5	2,700 nails/ctn (18 - 150 ct. coils) 3 fuel cells	Multi-Layers of Sheathing, Wood Blocking, and Dimensional Lumber

Fuel cell
Part No. TFUEL

T3 Battery
Part No. B0092MH

Plated 1" Lathing Disc
Part No. LD100

APPLICATIONS

Exterior Gypsum sheathing to steel framing, Plywood and OSB sheathing/flooring, Fiber cement panel attachment, Blocking Exterior walls, Windows/door bucks, Specialty exterior sheathing attachment, Woven wire mesh or expanded metal lath to steel framing.

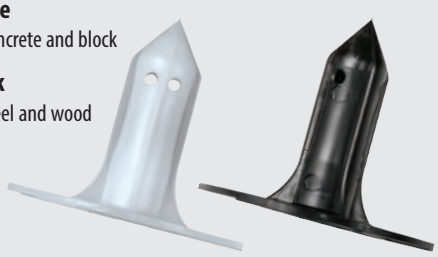
OSB and plywood to iSPAN joists

RAMSET T4 I-F COMPACT

The Ramset T4 I-F Compact System is 4 times faster than the traditional stick pin installation method. It allows the installer to attach insulation in one simple step without the use of adhesives or cutting spindle insulation anchors anymore

White
for concrete and block

Black
for steel and wood



FUEL CELL AND BATTERY

T4 Fuel Cell / Part No. T4FUEL

Replaces conventional powder loads and drives more than 1000 pins

Fuel injection means no additional steps of preparing a fuel cell. Click the fuel cell in place and the tool is ready to go.

T4 Battery / Part No. 18581

The 6-volt Li-Ion battery can drive more than 3500 shots per charge

- **Part No.: T4 I-FCT**
- Single shot gas tool
- One step fuel injection & eject
- Length: 15"
- Height: 15.25"
- Weight: 7.6lbs. with battery
- 2 year warranty
- Operating Temperature: 5°F to 122°F

ADVANTAGES

- Smaller and Lighter to reduce operator fatigue.
- 180 Degree rotating scaffold/belt book keeps the tool at hands reach at all times.
- Saves days over the traditional insulation fastening method saving time and labor costs.
- Safer than stick pins, powder actuated, and screw fastening methods.
- Fasten the insulation directly to concrete, hollow block, and steel studs. No need to glue and stick pin insulation anchors anymore.
- Tool allows you to fasten the insulation in tight spaces through pipes and sprinkler systems. The system can be used year round: unlike stick pins you wont be restricted by cold temperatures or wet surfaces.
- The T4FUEL can shoot more than 1000 shots before it needs to be replaced.
- 1"-6" insulation capacity.
- Increased power for improved stick rate.

APPLICATIONS

Most common application is fastening insulation to concrete, hollow block, and steel studs

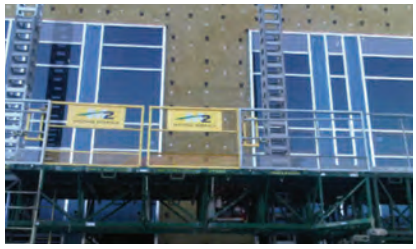
Above acoustical ceilings

Behind cladding over wood stud walls

Foundations & basements

Behind cladding over concrete block walls

Interior walls on concrete block



Behind cladding over steel stud walls

Faster and Safer, Industry-Approved Thermal Break Fastener

POWDERLOAD IDENTIFICATION

Lower Power ➡ Higher Power

Part No. RA27CUP

Works with 6' (V4-6) and 8' (V4-8) Poles

Part No. RA27MAG

Works with collated True Embedment (TE_X) Pins

Ramset's fully automatic RA27 powder-actuated tool, lowering downtime and fatigue on commercial jobsites. The RA27 stands up to tough use for interior and exterior applications:

- Track-to-Concrete
- Track-to-Steel
- Exterior Cladding Clips
- Deep Leg Track
- Electrical/Unistrut
- Hat Channel

RA27 TOOL SPECIFICATIONS

- **Part number: RA27**
- Weight: 5.3 lbs
- Maximum pin length without washer: 1½"
- Maximum pin length with washer: 2"
- 3-year warranty
- For use with .27 caliber loads (green, yellow, red)

RA27MAG MAGAZINE SPECIFICATIONS

- **Part number: RA27MAG**
- Weight: 1.3 lbs
- Maximum pin length: 1¼"

ADVANTAGES

- Lower pushdown force reduces fatigue
- Long-lasting piston reduces downtime
- Collar requires only ¼ turn for quicker cleaning
- More power load-for-load provides flexibility in a wide range of applications
- Swing out scaffold hook keeps the tool within reach

- Power adjust dial enables user to dial down power for ideal pin embedment
- Patented RRC (Residue Release Channel) allows tool to work longer between cleanings.
- Back end padding absorbs recoil, lowering fatigue
- Durable magazine providing up to 30% longer lifespan
- Belt/tether clip for safety

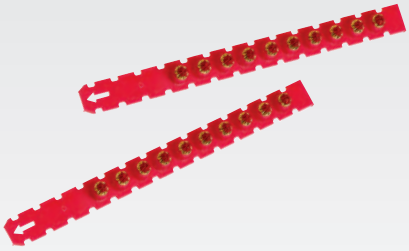
- 751321 Piston

RA54



Durable, Reliable, Powerful, Automatic

RA54

Ramset's most powerful tool with increased speed, less downtime and improved reliability for maximized productivity

The Ramset RA54 was specifically designed for the commercial framer for heavy-duty interior & exterior applications. The RA54's combination of high power and durability make it perfect for these applications:

- Driving 1-1/4" embedment for perimeter track
- Fastening track & clips to structural steel
- Track to hard concrete
- Excellent compliment to your Ramset TrakFast program

FEATURES

- **Part Number: RA54**
- .27 Caliber Strip Tool
- Automatic Piston Return
- Power Adjust Dial
- 3" Pin Capacity
- 3 Year Warranty
- .27 Caliber Strip Loads: 3 (Green), 4 (Yellow), 5 (Red) 6 (Purple)
- Weight: 7.25 lbs.
- Length: 19"
- Muzzle Bushing O.D.: 7/8"

ADVANTAGES

- Improved trigger pull
- Requires less cleaning than typical tools – less downtime
- More power load-for-load than the prior XT540 model.
- Ideal for hard concrete applications (purple loads)
- Quick and intuitive to dis-/re-assemble for cleaning and piston replacement minimizing downtime
- Ergonomically balanced
- Works with Magnetic Muzzle (Part# 100227) & Lathing Discs

MOST COMMON FASTENERS

PIN #	SHANK LENGTH IN.	SHANK LENGTH (MM)	MOST COMMON APPLICATION

SP114	1-1/4	31.8	Track to concrete

COMMON REPLACEMENT PART – AVAILABLE AT ITW SERVICE AND PARTS

- 37077 Piston
- 011483 Piston Return Spring

RA54MAG

Part No. RA54MAG

Works with collated True Embedment (TE) Pins

Purple loads are not recommended for use with magazine

COBRA

- **Part Number: COBRA**
- .27 Caliber Strip Tool
- Semi-Automatic
- Economical
- .27 caliber 10-shot strip loads: 3 (Green), 4 (Yellow), 5 (Red)
- Weight: 5.0 lbs.
- Length: 13-1/4"
- Muzzle Bushing O.D.: 9/16"
- Maximum Pin Length: 2-1/2" (3" w/washer)

ADVANTAGES

- Semi-automatic .27-caliber tool — uses strip loads
- Padded recoil-absorbing handle— for greater operator comfort
- Fastens up to 3" standard Ramset drive pins and threaded studs—ideal for general construction applications
- 1 Year Warranty

MOST COMMON FASTENERS

PIN #	SHANK LENGTH IN.	SHANK LENGTH (MM)	MOST COMMON APPLICATION

VIPER4

- **Part Number: VIPER4**
- .27 Caliber Strip Tool
- Semi-Automatic
- Designed Specifically for Overhead Applications
- 3 Year Warranty
- .27 caliber 10-shot strip loads: 3 (Green), 4 (Yellow), 5 (Red)
- Weight: 4.9 lbs.
- Length: 17.25"
- Maximum Pin Length: 1-1/2"

ADVANTAGES

- Automatic load advance: Load is advanced consistently each time the Viper is fired.
- Automatic Piston return: No time spent manually resetting or cycling the tool. Allows you to work faster.
- Overdrive Protection: Heavy duty buffer system prevents front end damage caused by piston overdrive —especially through sprayed-on insulation.
- Open Front-end design: Completely redesigned open-ended muzzle keeps your tool cleaner longer.
- Simplified Barrel Retention Collar: No tools are required for assembly or disassembly.
- Stable Steel Collar: The VIPER4 screws securely into the end of the extension pole with the steel collar ensuring a more durable and rigid connection.

TOOL/POLE CONNECTION
The new poles have an internal rod, when activated by pushing on the pole sleeve triggers the new VIPER4.

PART NUMBER	DESCRIPTION
V4-6	6' Pole
V4-8	8' Pole
V4-EXT	3' Extension (no trigger)

**Telescoping poles are NOT available for the VIPER4.*

FASTENERS

- **ELECTRICAL PIN/CLIP ASSEMBLIES**
  Preassembled Pin & Clips for some of the most common electrical applications increase jobsite speed for the electrician.
- **STANDARD PIN/CLIP ASSEMBLIES**
  SDC Fasteners are designed with special dimples on the angle clips which act as a shim and assure a snug fit between the structural member and the clip.
- **POWERPOINT® PIN/CLIP ASSEMBLIES**
  SPC Fasteners are assembled with the patented technology of PowerPoint pins for penetration in hard concrete and steel. The uniform shape and finish of the engineered tip results in more consistent performance in your toughest situations.

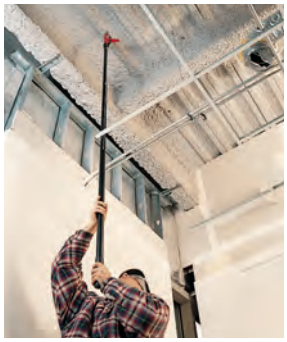
- MVP140 Piston

The VIPER4 screws solidly onto a pole for high reach and secure operation for ceiling applications.

The Viper was engineered specifically for overhead applications.



POLE TOOLS & CUPS

Cup and pole sold separately

FEATURES

- Pole tools allow to easily fasten in overhead applications safety from the floor.
- Eliminate the need for ladders and scaffolding.
- Cup accessories designed to ergonomically balance the tools directly over the poles for a lightweight feel.

EASY TO ASSEMBLE

CUP ACCESSORIES AND POLES

POLES FOR RAMSET VIPER4

PART #	LENGTH
V4-6	6' Pole
V4-8	8' Pole
V4-EXT	3' Extension (no trigger)

Ramset Pole Tools are an excellent choice for high-reach fastening applications.

Fast, easy installation from floor level eliminates lift baskets, scaffolds and ladders.

Uses VIPER4 pole system:

Works with three newly designed Ramset poles for greater ease and accuracy.

TOOL/POLE CONNECTION

The pole has a unique internal rod that when activated by pushing on the pole sleeve triggers the VIPER4.

Ramset®

Fastener Selection Table of Contents

Ramset Collated Gas Tool Fasteners are specifically engineered for optimal performance in Ramset Gas Power Tools using fastener magazines.

TRAKFAST STANDARD FUEL/PIN PACK

1000 PINS AND 1 FUEL CELL PER BOX

SELECTION CHART

For high volume, repetitive fastenings to concrete and steel such as drywall track to concrete

PART NUMBER	PIN LENGTH IN.	PIN LENGTH (MM)	DESCRIPTION
FPP012	1/2	(12.7)	1/2" Plated steel pin
FPP012S*	1/2	(12.7)	1/2" Premium Plated step shank pin
FPP058B	5/8	(16)	5/8" Black pin
FPP034B	3/4	(19.1)	3/4" Black pin
FPP034S*	3/4	(19.1)	3/4" Premium Plated step shank pin
FPP100	1	(25.4)	1" Plated pin
FPP114	1-1/4	(31.8)	1-1/4" Plated Pin

Shank diameter = .109 ** Shank diameter = .104/.118* *Head diameter = .250*
Sold in master cartons of 5000 minimum. Cartons cannot be split.

TRAKFAST BREAKAWAY STRIP FUEL/PIN PACK

1000 PINS AND 1 FUEL CELL PER BOX

Collation designed to breakaway on impact.
For high volume, repetitive fastenings to concrete such as wood furring to concrete

PART NUMBER	PIN LENGTH IN.	PIN LENGTH (MM)	DESCRIPTION
FPP034T	3/4	(19.1)	3/4" Plated pin
FPP100T	1	(25.4)	1" Plated pin
FPP114T	1-1/4	(31.8)	1-1/4" Plated Pin
FPP112T	1-1/2	(38.1)	1-1/2" Plated Pin

Shank diameter = .109 *Head diameter = .250*
Sold in master cartons of 5000 minimum. Cartons cannot be split.

TRAKFAST PLYWOOD PIN

1000 PINS AND 1 FUEL CELL PER BOX

For attaching plywood to metal studs

PART NUMBER	PIN LENGTH IN.	PIN LENGTH (MM)	DESCRIPTION
PLY138	1-3/8	(34.9)	1-3/8" Plated pin (knurled)

Shank diameter = .109 *Head diameter = .250* *Helical knurled shank* *Mechanical zinc plated*
Sold in master cartons of 5000 minimum. Cartons cannot be split.

ADVANTAGES

VS SCREWS

- 3 - 5 times faster than screw installation. No worrying about electrical cords.

STRIP

- Collation strip breaks away upon impact, allowing the head of the pin to recess into the wood for a nice, clean look
- 10-pin strips transfer easily from the operator's pouch to the TrakFast tool, eliminating waste

VS AIR SYSTEMS

- No set-up and tear down time. No hassling with compressors or hoses.

PINS

- Hardened steel pin ensures a clean penetration of the fastener — no dimpling of the stud
- Knurled helical shank gives the fastener superior holding values
- Zinc plated for corrosion resistance

T4MAG FUEL/PIN PACK

1000 PINS AND 1 FUEL CELL PER BOX

SELECTION CHART

Larger .125 shank diameter offers improved success rate (15 pin strip)

PART NUMBER	PIN LENGTH IN.	PIN LENGTH (MM)	DESCRIPTION
T4012	1/2	(12.7)	1/2" steel pin with T4 fuel cell
T4012S	1/2	(12.7)	1/2" premium steel pin with T4 fuel cell

T4034S*	3/4	(19.1)	3/4" step shank pin with T4 fuel cell
T4100	1	(25.4)	1" concrete pin with T4 fuel cell

*Shank diameter = .125 *Shank diameter= .104/.125 Head diameter = .250*

Sold in master cartons of 5100 minimum. Cartons cannot be split.

T3MAG FUEL/PIN PACK

1000 PINS AND 1 FUEL CELL PER BOX

Larger .125 shank diameter offers improved success rate (15 pin strip)

PART NUMBER	PIN LENGTH IN.	PIN LENGTH (MM)	DESCRIPTION
T3012	1/2	(12.7)	1/2" steel pin with T3 fuel cell
T3012S	1/2	(12.7)	1/2" premium steel pin with T3 fuel cell
T3034B	3/4	(19.1)	3/4" concrete pin with T3 fuel cell
T3034S*	3/4	(19.1)	3/4" step shank pin with T3 fuel cell
T3100	1	(25.4)	1" concrete pin with T3 fuel cell

*Shank diameter = .125 *Shank diameter= .104/.125 Head diameter = .250*

Sold in master cartons of 5000 minimum. Cartons cannot be split.

GYPFAST / G2 FASTENERS

For attaching exterior sheating,
both gypsum and plywood, to metal studs

PART NO.	FASTENER DESCRIPTION .140" DIA. KNURLED SHANK 5/16" DIA. BUGLE HEAD	MASTER CARTON QUANTITY	MASTER CARTON WEIGHT	APPLICATIONS
GF112	1-1/2" (38mm)	6,000 nails/ctn (40- 150 ct. coils) 6 fuel cells	37 lbs.	Single Layer of Exterior Sheathing, Wood Furring and Blocking
GF212	2-1/2" (64mm)	2,700 nails/ctn (18 - 150 ct. coils) 3 fuel cells	26 lbs.	Multi-Layers of Sheathing, Wood Blocking, and Dimensional Lumber

LONG LIFE COATING ALLOWS FOR USE IN:

- Exterior applications
- Treated Lumber
- Treated Plywood
- Fire Resistant Plywood
- 20g to 14g applications

T4SS SINGLE SHOT TOOL

The fasteners are designed for use in Ramset T3SS/T4SS single-shot gas tool

SELECTION CHART

THREADED ROD HANGER

For suspended ceilings, piping and other items using 1/4" or 3/8" threaded rod. Fastener is pre-assembled to a 16 gage threaded rod hanger. 100 per jar.

PART NUMBER	DESCRIPTION	MASTER CARTON QUANTITY
14TRHMP034	1/4" Rod hanger with 3/4" plated pin	800
38TRHMP034	3/8" Rod hanger with 3/4" plated pin	800

Shank diameter = .104/.125 Head diameter = .300

ONE HOLE STRAP

Used to attach EMT conduit or armored cable to concrete. Fastener pre-assembled to a 16 gage conduit strap. 100 per jar, 3/8" 200 per jar.

PART NUMBER	DESCRIPTION	MASTER CARTON QUANTITY
38HSMP034*	3/8" Hole strap with 3/4" plated pin	1200
12HSMP034	1/2" Hole strap with 3/4" plated pin	800
34HSMP034	3/4" Hole strap with 3/4" plated pin	600
10HSMP034	1" Hole strap with 3/4" plated pin	600

*Shank diameter = .104/.125 Head diameter = .300 *38HSMP034 = 18 gage, 200 per jar*

CONDUIT CLAMP

Used to attach conduit to concrete. Pin pre-assembled to an 18 gage conduit strap. 3/4" 25 per jar.

PART NUMBER	DESCRIPTION	MASTER CARTON QUANTITY
34CCMP034L	3/4" Conduit clamp with 3/4" plated pin	300

Shank diameter = .104/.125 Head diameter = .300

CEILING CLIP ASSEMBLY

Pre-assembled Ceiling Clip. Plated 14 gage clip. 100 per jar.

PART NUMBER	DESCRIPTION	MASTER CARTON QUANTITY
34CLIP	3/4" wide angle clip w/ 3/4" length pin	800

Shank diameter = .104/.125 Head diameter = .300 Hole diameter = 5/16"

AVAILABLE IN CONVENIENT JARS!

The new durable plastic containers mean less waste on the jobsite, or in the back of a truck. Their wide-mouth design makes it easy to grab what you need.

Each T3SS gas accessory and pin label provides vital holding value information—taking away the guess work.

T4SS SINGLE SHOT TOOL

The fasteners are designed for use in Ramset T3SS/T4SS single-shot gas tool

SELECTION CHART

TIE STRAP HOLDER

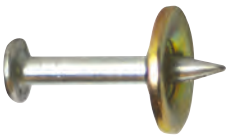
Used to install temporary lighting and secure low voltage cable to concrete, uses a standard cable tie up to 3/8" in width. Fastener is pre-assembled to a 22 gage tie strap holder. 50 per jar.

PART NUMBER	DESCRIPTION	MASTER CARTON QUANTITY
TSHMP034	Tie strap holder with 3/4" plated pin	1250

Shank diameter = .104/.125 Head diameter = .300

MECHANICAL PIN WITH WASHER

Used for the attachment of light gage metal to concrete and steel such as HVAC duct strap to concrete. Plated pin pre-assembled to a 1/2" domed washer. 200 per jar, 1" 100 per jar.



PART NUMBER	DESCRIPTION	MASTER CARTON QUANTITY
M034	3/4" Plated pin with domed washer	5000
M034BB	3/4" Premium step pin with domed washer	5000
M100	1" Plated pin with domed washer	5000

MUST USE WITH MAGNETIC WORK CONTACT ELEMENT (Part #19943 for T4SS / Part #M150200 for T3SS)

TOP HAT PIN

Used for general purpose fastening to concrete. Plated pin with top hat. 200 per jar.

PART NUMBER	DESCRIPTION	MASTER CARTON QUANTITY
MP034TH	3/4" Plated pin with top hat	5000

Shank diameter = .125 Head diameter = .300

We maintain only the highest standards in the materials, production techniques and quality control measures used to manufacture our fasteners, assuring consistent, optimum quality in every fastener.

FASTENER TERMINOLOGY SUFFIX

K = Knurled
B = Black
E = Ramguard
X = Collated
SD = Washer
TH = Top Hat
C = 100 count
M = 1000 count

ADVANTAGES

ITW Ramset powder actuated fasteners are specifically fabricated to meet the exacting requirements of toughness and durability that enable them to penetrate dense concrete and structural quality steel. All Ramset fasteners with .300 head will fit into tools with 8mm barrels.

SELECTION CHART

BLACK TRACK PINS

Designed for use in concrete and structural steel applications. Available in 100-pack or 1000-pack per box.

FASTENER ANGLE CLIP

General purpose 3/4" wide 90° angle clip. 14 gage angle clip. 100 zinc plated clips per box.

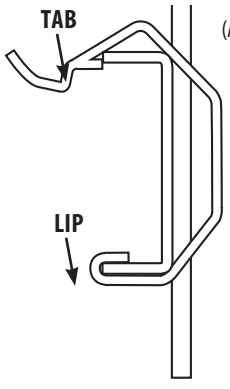
PART NUMBER	DESCRIPTION	MASTER CARTON QTY
1202CF	Angle clip (no pin)	1000

Hole diameter: 5/16" & 13/64"

LATHER CLIP CHANNEL HANGER

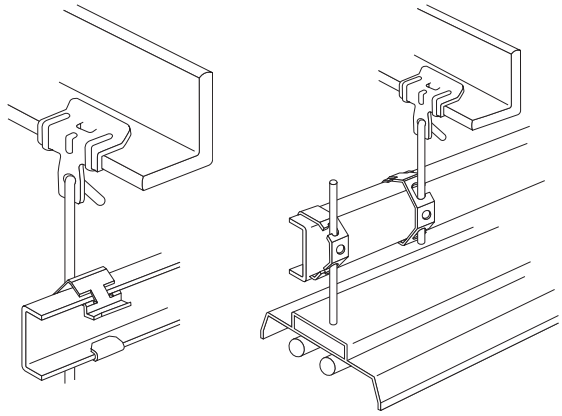
PART NUMBER	DESCRIPTION	MASTER CARTON QTY
LC112	1-1/2" Lathers Clip Channel Hanger for 1/4" Plain Rod	100

INSTALLATION



(Attached above clip)

1. Compress the clip and position on the rod at the desired location.
2. To install the channel, place the flange of the channel in the lip of the clip and rotate the channel toward the rod into position (see picture).
3. Use with cold rolled channel, with flange width 7/16" to 5/8" and hot rolled channel sizes 0.85#/ft and 0.105#/ft.
4. Static load limit, with a 3 to 1 safety factor, equals 160 lbs. Clip was tested to 480 lbs.
5. UL Tested



SELECTION CHART

HYBRID PIN

For general purpose attachments to concrete.

Shank diameter = .125/.150 Head diameter = .300

High Quality and Dependability

ITW Ramset powder loads and tools match tolerances to provide optimum power within recognized national velocity standards. Available in color-coded 10-load strips, and 100-load boxes.

Caution Always test-fasten with the lowest power level for your tool. If more power is necessary, use the next highest power level until proper level and fastening is achieved. Refer to operator's manual for more specific details. Observe all safety reminders. Tool operators must be trained and qualified as required by federal law. Failure to use properly can result in serious injury or death to users or bystanders.

Advantages Powder Guide
Power level is designated by the load level number marked on each box; also by the color of the box and each powder load. As the number increases, the power level increases.

22	50	50	50	50	110	110	110	110

For SI: 1 Inch = 25.4 mm, 1 Pound = 4.448 N.

[1] Tabulated values are for loads due to wind or earthquake, and must be reduced by 25 percent for other applications.

[2] Tabulated values allow for no more than 20 percent of the fasteners to be overdriven more than 1/16 inch.

[3] Minimum edge distance and spacing are 3/8 inch and 3 inches, respectively.

Allowable Shear for Wind Forces for Structural Plywood Shear Walls Attached to Light Gage Steel Studs with GypFast Fasteners[1,2,3] (pounds per foot)

PANEL TYPE	MINIMUM PANEL THICKENESS	FRAMING		FASTENER SPACING [4,5] (INCHES ON CENTER)			
		MINIMUN GAGE[6]	SPACING (INCHES ON CENTER)	6	4	3	2
Structural I or Rated Sheathing and Siding	3/8	22	16	180	270	360	459
	3/8		24	144	216	288	367
	15/32		16 or 24	170	255	340	433
	3/8	20	16	180	270	360	459
	3/8		24	144	216	288	367
	15/32		16 or 24	208	313	417	531
	3/8	18	16	214	321	428	546
	3/8		24	171	257	342	437
	15/32		16 or 24	253	380	506	645
	19/32		16 or 24	259	389	518	661
	23/32		16 or 24	259	389	518	661
	19/32	16	16 or 24	266	399	532	679
	23/32		16 or 24	296	445	593	756
	19/32	14	16 or 24	304	456	608	776
	23/32		16 or 24	345	517	690	879

For SI: 1 Inch = 25.4 mm, 1 Pound/Lineral Foot = 0.0146 N/mm.

[1] These values are for short-term loads due to wind and must be reduced 25 percent for normal loading

[2] The pin must be long enough to penetrate through the metal framing a minimum of 1/4 inch

[3] Tabulated values allow for a maximum of 20 percent of the fasteners to be overdriven more than 1/16 inch

[4] All panel edges must be blocked with mimum nominal 2-inch framing. Panels are mermitted to be installed either horizontally or vertically. Fasteners must be spaced a maximum of 6 inches on center along intermediate framing members for 3/8 inch-thick panels installed on framing spaced 24 inches on center, and 12 inches on center for framing 16 inches on center or thicker panels

[5] Tabulated values are for structural plywood panels applied to one side of a wall. Values cannot be increased for panels attached to both sides of a wall

Ramset fasteners may be specified by their type or catalog number to satisfy fastening requirements.

FASTENERS IN LIGHT WEIGHT CONCRETE

PART NUMBER SERIES	SHANK DIA (INCH)	MINIMUM PENETRATION (INCH)	ALLOWABLE WORKING VALUES INSTALLED IN 3,000 PSI LIGHTWEIGHT CONCRETE ALLOWABLE LOAD - *Ultimate Load*			
			3,000 PSI LIGHTWEIGHT W/DECKING		3,000 PSI LIGHTWEIGHT	
			LOWER FLUTE TENSION	LOWER FLUTE SHEAR	TENSION	SHEAR
SP SERIES	.150/.180	1	**119** *593*	**336** *1679*	**226** *1129*	**250** *1249*
		1-1/4	**175** *957*	**372** *1860*	**329** *1644*	**377** *1885*
		1-1/2	**179** *1055*	**426** *2128*	**406** *2030*	**380** *1900*

Note 1: ALLOWABLE loads are shown in the **LARGE BOLD** font, *Ultimate* loads are shown in *smaller italic* font. **Note 2:** Testing conducted in accordance with ICC AC70 & ASTM E1190. **Note 3:** Safety factors are based on coefficient of variation. In accordance with ICC AC70, the safety factor will be no less than 5. **Note 4:** Values shown in concrete are for the fastener only. Connected members must be investigated separately. **Note 5:** Cyclic, fatigue, shock loads, and other design criteria may require a different safety factor. **Note 6:** Job site testing may be required to determine actual job site values. **Note 7:** For SI: 1 lbf = 4.448 N, 1 inch = 25.4 mm, 1 ksi = 6.89MPa

Note 1: ALLOWABLE loads are shown in the **LARGE BOLD** font, *Ultimate* loads are shown in *smaller italic* font. **Note 2:** Testing conducted in accordance with ICC AC70 & ASTM E1190. **Note 3:** Safety factors are based on coefficient of variation. In accordance with ICC AC70, the safety factor will be no less than 5. **Note 4:** Cyclic, fatigue, shock loads, and other design criteria may require a different safety factor. **Note 5:** Job site testing may be required to determine actual job site values. **Note 6:** Values shown are for fastenings that have the entire pointed end of the fastener driven through the steel plate; except as noted below. **Note 7:** Fastener penetration is 3/8" minimum. **Note 8:** Fastener penetration is 7/16" minimum. **Note 9:** Fastener penetration is 1/2" minimum **Note 10:** For SI: 1 lbf = 4.448 N, 1 inch = 25.4 mm, 1 ksi = 6.89MPa.

Ramset fasteners may be specified by their type or catalog number to satisfy fastening requirements.

PIN SPECIFICATIONS

- Made from AISI 1060-1065 steel. Austempered to a core hardness of 52-56 Rc
- Typical tensile strength: 270,000 psi
- Typical shear strength: 162,000 psi
- **STANDARD FINISHES**
  Mechanical zinc plate to a minimum thickness of .0002 meets requirements of ASTM B695—Class 5 Type 1

APPROVALS/LISTINGS

- **ICC Evaluation Service, Inc.**

  #ESR-2690 Sill Plate
  #ESR-1799 Powder Pins & Clips
- **City of Los Angeles**

  #RR-22668 Powder pins

FASTENERS DRIVEN INTO CONCRETE MASONRY UNITS (CMU BLOCK)

PART NUMBER SERIES	SHANK DIA (INCH)	EMBED	HOLLOW UNGROUTED CMU				GROUT-FILLED CMU					
			FACE SHELL		MORTAR JOINT		FACE SHELL		MORTAR JOINT		TOP OF GROUTED CELL	
			TENSION	SHEAR	TENSION	SHEAR	TENSION	SHEAR	TENSION	SHEAR	TENSION	SHEAR
TE	0.157	1	**33** *329*	**100** *693*	**42** *443*	**68** *746*	**139** *875*	**145** *936*	**91** *950*	**127** *1328*	**165** *851*	**171** *922*

For SI: 1 Inch = 25.4 mm, 1 lbf = 4.448 N.
Fasteners must be installed a minimum of 5.1 inches from the end of the wall.
Fasteners must be installed at the center of the CMU cell. No more than one fastener may be installed in an individual CMU cell
Applicable to fasteners installed in the horizontal mortar joint (bed joint). Minimum fastener spacing must be 5.1 inches
Allowable shear load value applies to load applied perpendicular to the mortar joint
Fastener must be installed vertically at the top, center of grouted cell
Shear load can be in any direction perpendicular to the axis of the fastener

TE Embedment depth is easily identifiable by head stamps.
