

## Sound Control Sealant SC200

Ramset Sound Control Sealant is used to reduce sound transmission and increase acoustical performance in gypsum wall board partition systems. Adheres firmly to wood, metal, concrete and gypsum drywall surfaces. Ramset sound Control Sealant bridges gaps and building material irregularities up to 3/8" wide and 3/8" deep.

### Specifications

- Lead EQ Credit 4.1: Low-Emitting Materials: Adhesive & Sealants
- Meets ASTM E84, C919, E90
- 0/0 Flame and Smoke Spread Rating
- UL Classified
- Waterbase formula

Ramset is unique in the world of construction tools, fasteners and sealant manufacturing. Overall, 98% of Ramset fasteners and accessories are made in the USA.

## Walls & Ceilings

### RL3

#### Applications

- Drywall track layout
- Trim, windows and door frames

#### Features and Benefits

- Locking mechanism (pendulum lock) increases the durability and preserves calibration
- Audible out-of-level alert
- Rugged rubber housing protects precision laser components
- Third beam can be turned off to increase battery life

### RL2+

#### Applications

- Drywall track layout
- Trim, windows and door frames
- Soffits
- Suspended ceilings

#### Features and Benefits

- Cross line and plumb points all in one easy to use laser
- Locking mechanism (pendulum lock) increases the durability and preserves calibration
- Locked line mode allows for more complicated layouts; i.e., sloped areas, tile patterns
- Audible out-of-level alert
- Rugged rubber housing protects precision laser components

### Revolutionary Universal Stand

The stand is a tool unto itself that helps make the RL2+ the most versatile laser on the market today.

- Integrated laser stand works on studs and floor (patent pending)
- Magnetic: Powerful magnets easily secures to steel stud, even 25 gauge dimpled stud
- Stand works with 2" deep leg track
- Stand can bump the track to allow for plumb point alignment

## RL510 LASER

The RL510 is a fully automatic rotating laser that can be used for leveling, vertical alignment, plumbing and squaring. Applications include installing suspended ceilings, soffits, stud & track layout and a variety of interior alignment tasks.

### Advanced Features

- Integrated motorized wall mount adjustable by remote control
- Automatic self leveling in both horizontal and vertical modes
- Manual leveling mode for slopes or inclined planes
- Choice of beams: Rotating, Scanning, Chalk line
- Easy field calibration

#### LONGER LIFE

160 hours on two D alkalines  
40 hours on rechargeable NiCad

#### SAVE TIME

Built in WALL MOUNT  
virtually eliminates setup

#### SEE THE LIGHT

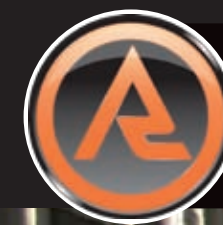

Laser target allows you to use in  
high ambient light applications

#### HANDS FREE

Remote allows you to adjust the  
laser from where you work

DRIVING JOBSITE SPEED

## DRYWALL SYSTEMS

**Ramset®**  
DRIVING JOBSITE SPEED

## Ramset has always set the standard for *Driving Jobsite Speed.*

As a commercial drywall framer, you're responsible for the entire project: front to back, top to bottom, inside and out. Since each aspect of the job has its own unique challenge, your tool and fastener combination may be the difference between success and failure. That's why when it comes to your drywall tools, look no further than Ramset's Drywall Systems.

# T3 MAG

The Power of the T3 allows you to consistently shoot where no other gas tool has gone before. The .125 diameter pin is specifically engineered to work in the toughest concrete and steel where other pins cannot perform. The new T3 system delivers power that rivals other gas and powder systems.

### Powerful New Features

The Ramset T3 fastens into hard concrete and steel with ease using these engineered features:

- 25% more power
- Larger diameter pin (.125) for higher stick rate
- Deep leg track capability
- Easy push down force
- One step fuel injected system
- 15-pin strip, 45-pin magazine
- Improved battery system

3000-Shot rechargeable battery with easy off switch that locks into place to extend battery life

## *GYPFAST* Fully Automatic Cordless Gas Fastening System

For attaching exterior sheathing to light gauge steel framing

### Applications

- Exterior Gypsum sheathing to steel framing
- Expanded metal lath to steel framing
- Woven wire mesh to steel framing
- Blocking

### Features

- Fully automatic system with 150 nail capacity is 3-5 times faster than screws
- Aggressive, patented nail shank design provides high pullout performance
- Contoured bulge head style provides high pullover (wind) resistance
- Long life Climacoat™ finish is 10 times more corrosion resistant than electro-zinc plating

## *XT540* Extreme Fastening

The XT540 was specifically designed for the commercial framer for heavy-duty interior & exterior applications.

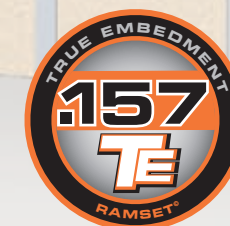

### The most powerful tool in its class

The XT540's combination of high power and durability make it perfect for these applications:

- Driving 1-1/4" embedment for perimeter track
- Fastening track & clips to structural steel
- Track to hard concrete

### Features

- Low recoil .27 caliber strip tool
- Dial down 2 full loads
- Ergonomically balanced
- Automatic piston return
- Trigger lock & hand guard to increase safety
- Capacity for up to 3" straight pin

## True Embedment Fasteners

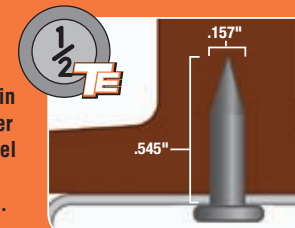

### Features

- No more increasing pin size to achieve required embedment
- Less wear and tear on tools and manpower
- Head stamps make for easy inspection

#### Steel Pins

Ramset's Power Point technology and unique pin design provides for easier penetration into hard steel reducing failures and increasing holding value.

#### Concrete Pins

**How they work:** For example, using the 1" .157 TE Pin, the actual embedment depth into the concrete is 1". There is no longer a need to use a 1-1/4" pin for 1" embedment.
